

## Postal Charges - February 2009

Below is a chart outlining the approximate costs of shipping our textiles to a range of destinations. The costs are based on an average fabric weight of 200gsm at a width of 150cm.

We use Australia Post to send our fabrics both locally & internationally as we are yet to find a logistics company with comparable pricing.

### Size restrictions

The maximum allowable parcel size with Australia Post is 105cm in length and 140cm in girth. Wider fabrics must therefore be folded lengthways and re-rolled in order to comply with these restrictions. This also limits the volume of fabric we can post in a single parcel. However larger orders can be split into multiple parcels.

### Weight restrictions

The maximum parcel weight is 20kg.

### Melbourne Metro orders

We prefer pickup for local orders where possible. You are also welcome to arrange your own pickup via a courier service.

### Handling charges

Handling fees are charged in addition to postage fees to cover our time & materials in packing your order. Please refer to the final column below for relevant handling fees.
